

September 2017

The Coos Coalition has just completed a January-June 2017 report for Coalition activities. The report shows that in the last 6 months:

- 497 caregivers of children 0-6 in Coos County were screened for depression by six different organizations.
- 292 ASQ developmental screenings were completed on children 0-6 by 8 different organizations
- 89 families were provided home visiting services by three different organizations.
- 20% of these families were single care takers.
- 26% children in the families served had been affected by substance abuse (Including 4 NAS babies)
- 1,020 books were provided to children 0-6 at well child visits through the Reach out and Read Program.

In addition, the Coalition sponsored a peer training for home visitors using the growing Great Kids curriculum. The training was focused on how to approach the issue of substance abuse in family visits. 32 staff from Coos and the Lakes Region attended the training.
