

July 2017

Impact Monadnock is wrapping up Year 1 of implementation of its strategic plan and celebrating small “wins” across the Monadnock Region. This spring, Vroom was launched at 2 high-visibility community events for children and families, which resulted in follow-up distribution of Vroom information and materials to 24 locations, including infant and pediatric hospital units. The Business Ambassadors of Impact Monadnock held a Breakfast Roundtable Event in early May to formally announce their new Membership Program. A Learning Community for early childhood professionals who received Pyramid Model Training held 5 meetings since last fall and is strategizing around meetings for the upcoming school year. At the end of June, a group of providers connected to discuss the development of a comprehensive list of providers in the area who offer emotional supports to young children (0-6 years old) and their families in need. All this work, and so much more, has been led by community coalitions while Impact Monadnock interviews for a new Project Director and prepares for Year 2 of implementation. Impact Monadnock and Monadnock United Way are aligning metrics and data collection practices to strengthen evaluation techniques.
