User Guide

Bedrock of the Granite State Banners

- The banners are in high demand so please return them on or before the date set forth on the banner reservation form.
- Keep the Banners in order- they are numbered 1-6 and also follow the color of the rainbow (as seen below)
- Always display the banners together. Please do not display them separately or as small groups.
- If the banners will be displayed near a resource table, please set out the Bedrock of the Granite State handouts for individuals to read and take (if you need help getting the handouts printed, contact Spark NH and we might be able to help print them.)
- Please take picture of the banners set up at your event and email them to Spark NH’s director, Laura Milliken at info@sparknh.org.
- Please use the following talking points when presenting the banners:

“These banners tell the story of every child’s development and will be on display in venues across our state to explain why children’s development matters to all of us and how children can best be supported to achieve positive outcomes. The banners were created by Spark NH, the state’s governor-appointed Early Childhood Advisory Council, as part of its work to improve public understanding of the importance of supporting the healthy development of New Hampshire children.

Spark NH is a public-private partnership that provides the leadership to promote a comprehensive, coordinated system of programs and supports for young children and families. To be successful, we’ll need the support of families, community and business leaders and policy makers.

To find out more about our work, about programs in your community, or to become a champion for children in New Hampshire, contact us or visit our website at www.sparknh.org.”
