

Carroll County Early Childhood Coalition: Update 9/2017

The Carroll County Early Childhood Coalition (CCECC) continues to build the awareness of the importance of the early childhood years in laying a strong foundation for lifelong health outcomes and future success of our children and families in our communities. Over the summer months SparkNH's Bedrock Presentation has been presented to 4 different community groups including local healthcare providers, community mental health center staff and members of a local faith community. This fall presentations are scheduled to Rotary, Kiwanis and Lions Clubs, as well as local school board members. CCECC has also hosted 2 Trauma-informed Care Presentations by Linda Douglas of the NH Coalition to End Domestic and Sexual Violence. These events are sustaining the momentum of the public engagement efforts that started last year with the support of NH Listens, and are an integral part of local efforts to ensure all families in the SAU9 School district have access to publicly supported early childhood programming.
